GENERAL OVERVIEW

For convenient use IT added a search function in Yamato Online Stock 2.0.
This can still be used to find your preferred models in an efficient manner.

The newest update contains small tweaks and fixes to improve the customer's experience.

The table has been updated to show the difference between physical and economical stock.
It is now a simple overview with the balance of incoming goods, current stock and outgoing goods.
To select this overview you must select "Both" on the Status filter.

Instead of two drop-down lists, there are now two new text bars where you can type a principal and the location.

As you can see above there are two examples and by clicking your desired value from the list, it activates the selected principal/location. This brings us to the next point.

HEADINGS(1/2)

Welcome to the next chapter! I will explain about the headings in this chapter.
For example: Their use, the definition and where to find them.
Let's start with the Model and 2nd Model headings.
It shows us the name of the product in the online stock and the 2nd model name.
The model name is an abbreviation of the product with the product number.

Model	2nd model
Cat Model	Cat Model
Van Model	Van Model
Yamato Cat Keyring	Yamato Cat Keyring
Yamato Pencil	Yamato Pencil

When you look further on the Excel-like structure, you can see the stock numbers, reserved products and the available products. The "Stock" heading shows the products you have, "Reserved" shows how much products that have been reserved for delivery to your customers and the heading "Available" shows the "Stock" minus the "Reserved" products which shows what the actual stock is.
It also shows the goods per carton/box instead of single units.

Stock	Reserved	Available
275	4	271
50	0	50
100	0	100
25	0	25
100	4	96

In Stock pcs	Reserved pcs	Available pcs

These headings display the amounts per single product unit, these can be found on the right side of the table:

Total pcs	Reserved pcs	Available pcs
2490	236	2254

For example Yamato Pencil is a total of 100 in stock.
But they are actually (100x10). Then the following headings will display "1000".

After the "Available" heading you can view the arrival date and the reference numbers of the items in stock. A reference number is an identification number that has been specified during the shipping process. It can be any combination of letters and numbers.
This reference would be the number of a purchase order but can also be a customer number for example.

Arrival date	Reference
05/09/2013	120548932
05/09/2013	120548932
05/09/2013	120548932
05/09/2013	120548932

Let's continue with the second part of the chapter "Headings" and as you can see; you have "Remarks", "Stock pieces", "Reserved pieces" and the "Available pieces".
Usually the fields of the remarks section are left blank. But for example when the goods are being rebooked or transferred, you can see "Rebooked" or "Transfer".

Remarks	Stock pcs	Reserved pcs	Available pcs ▲
	1850	48	1802
	50	0	50
	100	0	100
	500	0	500
	1200	48	1152

Stock pieces stand for the amount of pieces in stock. The reserved shows pieces that have been reserved and the available pieces section shows the actual available pieces in stock.

And now we have arrived at the last 3 headings, the principals, locations and the latest update. The principal section shows us the related principal to the model in stock.
The location shows us where the stock has been stored.
And the latest update shows you when the actual values of the stocks have been updated.

Principal	Location	Last update
Yamato Demo Stock	Rotterdam	05/09/2013 10:50
Yamato Demo Stock	Rotterdam	05/09/2013 10:49
Yamato Demo Stock	Rotterdam	05/09/2013 10:49
Yamato Demo Stock	Rotterdam	05/09/2013 11:32

ADDITIONAL FEATURES(1/2)

The online stock system also has a couple filters which will be explained in this chapter.
The first filter you will see is the "Status filter" which gives you three options;

Status   ◉ In Stock   ● To Receive   ● Total   ● Both

"In stock" shows which models you have in stock:

We have arrived at the latest section of the "Additional Features" chapter! The latest filter is the little checkbox on the right with "Grouped" next to it.

Grouped ☐

| Yamato Cat Keyring | Yamato Cat Keyring | 100 | 0 | 100 | 05/10/2013 | 545489221 |

The unchecked box shows you the same models with different arrival dates and order references. But when you check the box, you will get this as a result:

Grouped ☑

As you can see, all the different order references have been added into one single line.

| Yamato Cat Keyring | 125 | 0 | 125 | 05/09/2013 t/m 05/10/2013 | 120548932 ,545489221 |
